Review of May's Presentation

By Ron Dack

May's meeting was supposed to feature **Ray Almodovar, NapaNet**, who was to be discussing the available services of **NapaNet**.

Ray was injured at work that day and couldn't make it to our meeting.

Fortunately **Sharon Wragg** had a presentation on

NVPCUG

Our June 15, 2016 meeting will feature **Ron Bello** from **CE-GROUP** 1562 Silverado Trail, Napa, CA 94559 (707)257-9701

Ron will be discussing the services available at **CE-Group** and answer questions you have about computers and peripherals such as printers, monitors, mice, and others.

Now is your chance to ask those questions we can't answer.

Prior to Ron's presentation we will have a presentation by **Martin Bell** a Web Annalist recently from **O'Rilly Media**. Martin will discuss web tracking and the acquisition of information about the web browser (person).

Both these presentations should be well worth your time. You will not be sorry you attended this meeting. Bring a friend I am sure they will appreciate the meeting and the information.

Remember Wednesday June 15, 2016 at 7PM. Napa Senior Activity Center 1500 Jefferson Street, Napa.

Review continued:

web browsers and the available tools you will find on each.

Sharon went through each and demonstrated word processing, spread sheets, finance, maps, calculation, contacts, web tools, as well as other apps that are included in different browsers.

Hopefully Ray will be well in July and can come to that meeting and do his presentation.

I want to thank Sharon for stepping up and covering the situation for us. I found her presentation very interesting. It gave me several ideas how to use my web browsers other than just visiting web sites.
